

**Supplementary Figure 2.** Edge weight bootstrapped difference test result of the network before and during the COVID-19 pandemic. Black boxes show edges that differ significantly from each other. Gray boxes show edges that do not significantly differ from each other. The number of black boxes is higher before than during the COVID-19 pandemic, indicating that the stability in the network is relatively high. P6, impairment in work functioning; P7, impairment in social functioning; AgoP, agoraphobia; IntP, interoceptive fear; P4, agoraphobic fear/avoidance; P5, panic-related sensation fear/avoidance; SoP, social phobia; D, Beck Depression Inventory-II (BDI-II); SH, functional impairment; AS, Anxiety Sensitivity Index-Revised (ASI-R); P1, panic attack frequency; P2, distress during panic attacks; P3, severity of anticipatory anxiety; COVID-19, coronavirus disease-2019.
